### SUMMARY

During my Computer Engineering studies, I gained knowledge and experience in the fields of object-oriented programming, web development and computer networks. Through my studies and freelance work, I have participated in both individual and team projects, focusing particularly on web and mobile application development. I continue to keep myself up to date and develop professionally by keeping abreast of constantly evolving technologies.

### EXPERIENCE

**Flutter Developer Intern, Alpata Technology and Software** 07.2025 - 08.2025

- I have developed a digital business card app featuring QR code-based sharing capabilities, multilingual support and a modern interface.

**Front-end Web Developer Intern, PITON Technology** 07.2024 - 08.2024

- I developed a basic e-commerce platform for books using tools such as React, TypeScript, TailwindCSS and Zustand.

### PROJECTS

**TÜBİTAK 2209-A - An 'StackOverflow'-style platform running on an internal network** 2024 - 2025

- On the project, I was responsible for front-end development, API integration and user interface design.

**Ortak - Taksiri Paylaş!** 2026

- We developed a mobile app that allows users to share the cost of a taxi journey along the same route. It has been released on the App Store, and I assisted with the development of both the mobile and back-end components.

### SKILLS

HTML, CSS, JS, Bootstrap, TailwindCSS, React, NextJS, PHP, Typescript, NodeJS, ExpressJS, MySQL, PostgreSQL, GraphQL, RestAPIs, C#, Python, Flutter, React Native, Git, Postman

### EDUCATION

**Balıkesir University** 2021 - 2025

Computer Engineering – 3.62 GPA

### LANGUAGES

- English (intermediate)
- German (beginner)
